QUALITY POLICY

CDJ Engineering is a provider of Engineering Services through Design, Drafting Procurement and Management of both Turnkey and Construction Projects. The company strives to ensure the quality of CDJ's services and product is of the required standard and that it is delivered with the company aims of integrity and excellence in mind. Through continual ongoing development, it strives to meet the following quality objectives:

- Ensuring that its customers needs are always met;
- Having a commitment to excellence;
- Developing & maintain strong, team based culture within the company committed to quality.

In order to meet these objectives, the company maintains the following:

- Having an entire quality system modeled on the AS/NZS ISO 9001:2000 internationally recognized standard;
- Promoting a pro-active approach within the group for all its operational activities, in particular quality management;
- That all its staff are competent and have the necessary skills in order to carry out their respective duties;
- That it provides an environment in which further training can be undertaken where necessary in order to deliver customer satisfaction;
- Empowering employees on the importance of quality management;
- It can clearly demonstrate a commitment to quality by conducting regular management reviews on the entire quality system and continually improving its processes.

This policy will be reviewed at regular intervals in accordance with the management review requirements of AS/NZS ISO 9001:2000, Clause 5.6.1 and where appropriate, will be revised accordingly.
